

Politics of Growth | PS 2543 | Week 5

Michaël Aklin

Research: where to start...

- ▶ Always a challenge...

Research: where to start...

- ▶ Always a challenge...
- ▶ One approach: **gap** in the literature

Research: where to start...

- ▶ Always a challenge...
- ▶ One approach: **gap** in the literature
- ▶ Idea: people have looked at...

Research: where to start...

- ▶ Always a challenge...
- ▶ One approach: **gap** in the literature
- ▶ Idea: people have looked at...
 - ▶ $X \rightarrow Y$

Research: where to start...

- ▶ Always a challenge...
- ▶ One approach: **gap** in the literature
- ▶ Idea: people have looked at...
 - ▶ $X \rightarrow Y$
 - ▶ $Z \rightarrow Y$

Research: where to start...

- ▶ Always a challenge...
- ▶ One approach: **gap** in the literature
- ▶ Idea: people have looked at...
 - ▶ $X \rightarrow Y$
 - ▶ $Z \rightarrow Y$
 - ▶ What about $X \rightarrow Z$?

Research: where to start...

- ▶ Always a challenge...
- ▶ One approach: **gap** in the literature
- ▶ Idea: people have looked at...
 - ▶ $X \rightarrow Y$
 - ▶ $Z \rightarrow Y$
 - ▶ What about $X \rightarrow Z$?
- ▶ Not very compelling

Research: where to start...

- ▶ Always a challenge...
- ▶ One approach: **gap** in the literature
- ▶ Idea: people have looked at...
 - ▶ $X \rightarrow Y$
 - ▶ $Z \rightarrow Y$
 - ▶ What about $X \rightarrow Z$?
- ▶ Not very compelling
- ▶ Instead: focus on **expanding** research rather than filling gaps

More compelling...

▶ **Interesting** treatments

More compelling...

- ▶ **Interesting** treatments

- ▶ Can come from other disciplines

More compelling...

- ▶ **Interesting** treatments
 - ▶ Can come from other disciplines
 - ▶ Eg: social capital

More compelling...

- ▶ **Interesting** treatments
 - ▶ Can come from other disciplines
 - ▶ Eg: social capital
- ▶ **Important** outcomes

More compelling...

- ▶ **Interesting** treatments
 - ▶ Can come from other disciplines
 - ▶ Eg: social capital
- ▶ **Important** outcomes
 - ▶ People care about it!

More compelling...

- ▶ **Interesting** treatments
 - ▶ Can come from other disciplines
 - ▶ Eg: social capital
- ▶ **Important** outcomes
 - ▶ People care about it!
- ▶ Spell out **mechanisms**

More compelling...

- ▶ **Interesting** treatments
 - ▶ Can come from other disciplines
 - ▶ Eg: social capital
- ▶ **Important** outcomes
 - ▶ People care about it!
- ▶ Spell out **mechanisms**
- ▶ Ask a yes/no question

► Typically: contribution comes from...

▶ Typically: contribution comes from...

▶ New theory

- ▶ Typically: contribution comes from...
- ▶ New theory
 - ▶ Democratic peace

- ▶ Typically: contribution comes from...
- ▶ New theory
 - ▶ Democratic peace
- ▶ New data

- ▶ Typically: contribution comes from...
- ▶ New theory
 - ▶ Democratic peace
- ▶ New data
 - ▶ Military recruitment early 1800s

- ▶ Typically: contribution comes from...
- ▶ New theory
 - ▶ Democratic peace
- ▶ New data
 - ▶ Military recruitment early 1800s
- ▶ New empirical strategy

- ▶ Typically: contribution comes from...
- ▶ New theory
 - ▶ Democratic peace
- ▶ New data
 - ▶ Military recruitment early 1800s
- ▶ New empirical strategy
 - ▶ How can we measure political ideology?

- ▶ Typically: contribution comes from...
- ▶ New theory
 - ▶ Democratic peace
- ▶ New data
 - ▶ Military recruitment early 1800s
- ▶ New empirical strategy
 - ▶ How can we measure political ideology?
- ▶ (Almost) never all three... but at least one!

Theory

- ▶ Many ways to proceed. Here's mine.

Theory

- ▶ Many ways to proceed. Here's mine.
- ▶ Step 1: use a decision/game-theoretic approach:

Theory

- ▶ Many ways to proceed. Here's mine.
- ▶ Step 1: use a decision/game-theoretic approach:
 1. Players: who matters? (**unit of analysis**)

Theory

- ▶ Many ways to proceed. Here's mine.
- ▶ Step 1: use a decision/game-theoretic approach:
 1. Players: who matters? (**unit of analysis**)
 2. Strategies: what can players do?

Theory

- ▶ Many ways to proceed. Here's mine.
- ▶ Step 1: use a decision/game-theoretic approach:
 1. Players: who matters? (**unit of analysis**)
 2. Strategies: what can players do?
 3. Payoffs: what are their preferences?

Theory

- ▶ Many ways to proceed. Here's mine.
- ▶ Step 1: use a decision/game-theoretic approach:
 1. Players: who matters? (**unit of analysis**)
 2. Strategies: what can players do?
 3. Payoffs: what are their preferences?
- ▶ Step 2: generate comparative statics

Theory

- ▶ Many ways to proceed. Here's mine.
- ▶ Step 1: use a decision/game-theoretic approach:
 1. Players: who matters? (**unit of analysis**)
 2. Strategies: what can players do?
 3. Payoffs: what are their preferences?
- ▶ Step 2: generate comparative statics
 - ▶ When pref change, what happens to strategies?

Theory

- ▶ Many ways to proceed. Here's mine.
- ▶ Step 1: use a decision/game-theoretic approach:
 1. Players: who matters? (**unit of analysis**)
 2. Strategies: what can players do?
 3. Payoffs: what are their preferences?
- ▶ Step 2: generate comparative statics
 - ▶ When pref change, what happens to strategies?
 - ▶ Note: you want observables on both!

Theory

- ▶ Many ways to proceed. Here's mine.
- ▶ Step 1: use a decision/game-theoretic approach:
 1. Players: who matters? (**unit of analysis**)
 2. Strategies: what can players do?
 3. Payoffs: what are their preferences?
- ▶ Step 2: generate comparative statics
 - ▶ When pref change, what happens to strategies?
 - ▶ Note: you want observables on both!
- ▶ Does not preclude more complicated approaches (beliefs, culture, networks, etc.)

Questions?
